PROFILE SUMMARY

Front-End Developer with nearly 1 year of experience building responsive, user-focused web applications using React.js. Proficient in Git, Tailwind CSS, Python, and SQL. Skilled in writing clean, maintainable code and working in cross-functional teams. Strong in component-based architecture, problem-solving, and meeting project deadlines. Eager to contribute technical skills and grow within a dynamic development environment.

WORK EXPERIENCE

Carviewing Solutions LLP

Trainee Software Engineer

SEP 2024 - PRESENT

-Bengaluru, Karnataka

- Developed and maintained responsive user interfaces using React.js and PrimeReact for enterprise-level applications, in project for the client Bayer CropScience(India).
- Researched and evaluated new technologies and development methodologies to stay current with industry trends and enhance project outcomes.
- Managed version control using Git, facilitating efficient code collaboration and deployment workflows.

PROJECT

Sales Planning Tool (Bayer CropScience India)

- Description:**
 - A web-based application designed to simplify sales planning and inventory liquidation processes. The tool enables effective management of sales data, real-time inventory tracking, and supports data-driven decision-making.
- Role:** Frontend React Developer
 - Developed a responsive and high-performance UI using React.js.
 - Implemented interactive tables and visualizations with PrimeReact for sales and liquidation data.
 - Designed clean, user-friendly layouts to improve navigation and usability.
 - Integrated dynamic APIs in coordination with the backend team.
 - Styled components with CSS and Styled Components to maintain brand consistency and responsiveness.
- Technologies:** React.js, PrimeReact, CSS, Styled Components
